Skills

Frontend: HTML, CSS, Bootstrap, Tailwind CSS, JavaScript (TypeScript, **React.js, Next.js**, AJAX, jQuery)

Backend: Node.js, Express.js, PHP (**Laravel**), Python, **API** Development & Integration

DevOps & Tools: Git, **GitHub**, Docker, Postman, **Socket.IO**, Nginx, PM2, CI/CD Pipelines (GitHub Actions), Jira, Trello, **AWS (EC2, RDS, S3),** Mysql, Postgresql, MongoDB

Methodologies: Agile (Scrum)

Soft Skills: Leadership, Team Management, Problem-solving, Collaboration

Languages: JavaScript, PHP, Python

Professional Experience

Senior Full stack Developer & Team Lead   **Emergi Mentors** (Jan 2025 - Present)

Currently working at Emegi Mentor, a startup where I lead the development team as a Senior Full Stack Developer. Responsible for frontend review, backend development, and **AWS cloud deployment**, ensuring seamless performance and scalability. Implemented AI-driven features and adopted **Agile methodologies (Scrum)** to streamline development and enhance product efficiency.

Senior Web Developer   **Desired Technology** (Jan 2023 - Nov 2024)

Transforming ideas into powerful digital solutions by developing **AI-driven** and **subscription-based** platforms that enhance user engagement. Built scalable applications for **logistics, finance, and healthcare**, ensuring seamless performance and efficiency. Optimized backend architectures with Laravel and PHP for robust data management and high-performance operations. Led platform maintenance and upgrades, focusing on scalability, security, and operational excellence.

Web Developer and IT support representatives   **TATECHWORLD** (Apr 2021 - Jan 2023)

Gained hands-on experience through an internship, applying web development skills in real-world projects. Developed a dynamic platform for seamless online bookings, optimizing user experience and operational efficiency. Enhanced expertise in HTML, CSS, Bootstrap, PHP, and Laravel by building intuitive interfaces and robust backend solutions.

Projects Section

Job Bank

- **AI-driven web application** for generating quizzes, interview questions, and resumes.
- Technologies: Next.js, PHP, and a subscription-based business model.

Automove

- Created a dispatch and logistics platform for Desired Technology, streamlining **bookings and delivery operations.**
- Technologies: React, Bootstrap (Frontend), PHP (Backend).

Office Orbit

- Designed Laravel **backends for mobile apps** to track company expenses and internal project workflows efficiently.

Expense Wallet

- Designed PHP **backends for mobile apps** to track company expenses and internal project workflows efficiently.

Interact Immigration

- Improved and maintained a platform to simplify immigration-related services,
- optimizing both front-end and back-end workflows.

Medipedia

- Built an MCQs web app for Desired Technology's medical student firm.
- Technologies: React (Next.js), Bootstrap UI, NextAuth, PHP.

Majestic Distribution

- PHP Bootstrap solution for effortless national bookings and international syndicate deliveries of fresh fruits and vegetables.
Jumbo Cash

- Tailored a Laravel Bootstrap **script from CodeCanyon**, enabling multiple plans, daily profits, and a custom referral system for online earning.

Skill Alfa Institute

- Explore Skill Alfa: Main site built with Laravel & React for course browsing; admin side, Skill Alfa Hub, made with Laravel & Bootstrap, ensuring seamless learning.

E-commerce Platform (Josam)

- Built a robust online store using **Node.js, Express.js, React.js, and Next.js,** featuring custom API integration and advanced search functionality.
- The project included four distinct panels: three web-based (**admin, vendor, customer**) and one mobile app (**Driver**).

Education

- Matric – The Educators
- Intermediate – Punjab Group of Colleges
- B.Sc. Software Engineering – Arid Agriculture University
- Web Development Course – TATECH WORLD

Certifications 🔗

- Technical Courses (React.js + DevOps Fundamentals) – Hadi eLearning
- Python + Basic AI Courses – Afwera

Achievements

ETL Resume Presentation Competition
- Secured 4th Place 🥉 in the Tech Resume Competition organized by ETL Online!

Startup Idea Selected in PITB
- Successfully pitched and got recognition for an innovative startup idea under the Punjab Information Technology Board (PITB) program, showcasing entrepreneurial skills and creativity.

Volunteering 🔗

ETL Online Ambassador
- Inspired growth, encouraged participation in ETL courses, and promoted lifelong learning for collective success.

Aspiring DevOps & AI Enthusiast

Passionate about exploring new technologies and expanding my skill set. Currently focused on DevOps, mastering CI/CD pipelines, containerization, and cloud infrastructure to create scalable solutions. Additionally, developing a keen interest in AI, actively learning and exploring its applications to integrate intelligent solutions into modern tech stacks.

Key Implementations & Integrations

- Integrated Stripe and PayPal payment gateways across multiple websites.
- Implemented Agora for video calling features in a web application.
- Integrated Twilio for SMS communication.
- Developed social login authentication for multiple websites.
- Set up a full-fledged CI/CD pipeline in the Josam project.
- Integrated an LLM model in a job portal project to generate quizzes and interview questions.
